

## High-rise living at its best

Sta. Lucia Land Inc. brings into fruition its first condominium project in Metro Manila — the La Breza Tower (The Breeze).

Situated right along Mother Ignacia St. in Quezon City, La Breza is a 22-story, quiet and luxurious development that combines commercial spaces, condotel functions, and residential units. At the ground and second floors are restaurants, specialty shops and the hotel lobby.

Amenities include a swimming pool, fitness gym, and function rooms. Available are studio, one-bedroom and three-bedroom units.

La Breza Tower combines convenience and comfort in its architecture, designed by W.V. Coscolluela and Associates. The interiors are well-appointed and designed by Songsong & Periquet.

Developer Sta. Lucia Land, Inc. brings to La Breza the expertise of over 35 years of developing communities, resorts, malls and several high-rise condominiums. Projects are located in key cities nationwide, with proximity to important establishments.
